

BRECK

Released in 2017, Breck is the newest hard white variety to be included in the CWRP/Ardent Mills Ultragrain® Premium Program. In addition to excellent milling quality and very good baking quality, Breck has low grain polyphenol oxidase (low PPO). Low PPO is a property desired by end users that reduces browning of baked goods, a benefit in whole grain applications. Breck also offers excellent yields, similar to Antero, with excellent test weight, excellent sprouting tolerance and resistance to Stripe Rust.

CHARACTERISTICS

MATURITY	Medium
HEIGHT	Medium-tall
YIELD	Very high
DROUGHT TOLERANCE	Good
MILLING QUALITY	Excellent
BAKING QUALITY	Good
STRAW STRENGTH	Very good
TEST WEIGHT	Excellent
PROTEIN	Very good
COLEOPTILE LENGTH	Medium-long
PEDIGREE	Denali/HV9W07-482W//Antero

HARD WHITE

Management:

- Premium pricing with protein scale available from Ardent Mills equal to Sunshine and Thunder CL
- Also available as a non-exclusive variety in grain trade
- Apply proper nutrients to achieve desired quality targets
- Marginal tolerance where Soilborne Mosaic Virus is a concern
