

HATCHER

With consistently high dryland yields and superior drought tolerance, Hatcher's long-term stability has made it one of the most widely planted varieties in Colorado since 2001. Hatcher has an established reputation for recovering well from poor stands and has maintained an intermediate level of resistance to stripe rust since its release.

CHARACTERISTICS

MATURITY	Medium
HEIGHT	Medium-short
YIELD	High
DROUGHT TOLERANCE	Good
MILLING QUALITY	Good
BAKING QUALITY	Very good
STRAW STRENGTH	Fair
TEST WEIGHT	Good
PROTEIN	Fair
COLEOPTILE LENGTH	Average
PEDIGREE	Yuma/PI 372129//TAM 200/ 3/4*Yuma/4/KS91H184/Vista

HARD RED

Management:

- Proven dryland performance
- Include in diverse variety selection
- Good for drought conditions
