

BYRD CL PLUS

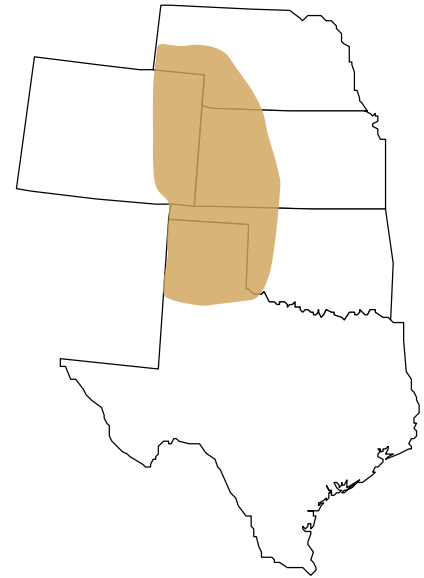

CHARACTERISTICS HARD RED WINTER

MATURITY	Medium
HEIGHT	Medium-Tall
YIELD	Very High
DROUGHT TOLERANCE	Very Good
MILLING QUALITY	Good
BAKING QUALITY	Good
STRAW STRENGTH	Good
TEST WEIGHT	Good
PROTEIN	Fair
COLEOPTILE LENGTH	Medium-Short
PEDIGREE	CO06072/4*Byrd

AREA OF ADAPTATION

Variety Protection Status

PVP Unauthorized Propagation Prohibited - to Be Sold by Variety name Only As a Class of Certified Seed - U.S. Protected Variety - 1994 PVPA

FEATURES & BENEFITS

Released in 2018, Byrd CL Plus is a two-gene Clearfield version of Byrd bred by crossing the tolerance genes into Byrd and developing

a new line with nearly all of the same agronomic benefits you've come to expect from Byrd, including drought stress tolerance and yield responsiveness to moisture. It is slightly taller than Byrd, with better straw strength. Certified Seed Only, no saved seed allowed.

CERTIFIED SEED ONLY

Byrd CL Plus is a Certified Seed Only variety. By purchasing seed, grower agrees to use seed of the variety only for the production of a commercial grain or forage crop. Using certified seed every season ensures the best stewardship, end use functionality, and opportunity to maximize yield potential of the variety. Resale of this seed, or supply of saved seed derived from this seed, to anyone including purchaser for planting is prohibited.

STEWARDSHIP AGREEMENT REQUIRED

In addition to purchasing certified seed every year, farmers are required to sign, and adhere to, the Clearfield® Wheat Stewardship Grower Agreement outlining best management practices on product rates for Beyond® herbicide, crop rotation, and cultural practices.
