

CRESCENT AX

CHARACTERISTICS HARD RED WINTER

MATURITY	Medium-Early
HEIGHT	Medium
YIELD	Good
DROUGHT TOLERANCE	Good
MILLING QUALITY	Very Good
BAKING QUALITY	Very Good
STRAW STRENGTH	Good
TEST WEIGHT	Very Good
PROTEIN	Fair
COLEOPTILE LENGTH	Medium
PEDIGREE	AF28/Byrd//AF10/2*Byrd

Variety Protection Status

PVP Unauthorized Propagation Prohibited - to Be Sold by Variety name Only As a Class of Certified Seed - U.S. Protected Variety - 1994 PVPA

AREA OF ADAPTATION

FEATURES & BENEFITS

Released in 2018, Crescent AX is the newest CoAXium® variety in the PlainsGold lineup with a solid agronomic package and excellent

tolerance to Aggressor® herbicide. Crescent AX has medium-early maturity, very good test weight, wheat curl mite resistance from its Byrd parent, and very good end-use quality. Certified Seed Only, no saved seed allowed, Stewardship Agreement required.

CERTIFIED SEED ONLY

Crescent AX is a Certified Seed Only variety. By purchasing seed, grower agrees to use seed of the variety only for the production of a commercial grain or forage crop. Using certified seed every season ensures the best stewardship, end use functionality, and opportunity to maximize yield potential of the variety. Resale of this seed, or supply of saved seed derived from this seed, to anyone including purchaser for planting is prohibited.

STEWARDSHIP AGREEMENT REQUIRED

In addition to purchasing Certified Seed every year, farmers are required to sign, and adhere to, the CoAXium® Wheat Production System Grower Stewardship Agreement outlining best management practices on product rates, crop rotation, mechanical and cultural practices and CoAXium® and Aggressor® use guidelines in different cropping systems.
