

# WHISTLER

## CHARACTERISTICS HARD RED WINTER

<b>MATURITY</b>	Medium-Late
<b>HEIGHT</b>	Medium-Tall
<b>YIELD</b>	Excellent
<b>DROUGHT TOLERANCE</b>	Very Good
<b>MILLING QUALITY</b>	Fair
<b>BAKING QUALITY</b>	Very good
<b>STRAW STRENGTH</b>	Fair
<b>TEST WEIGHT</b>	Good
<b>PROTEIN</b>	Good
<b>COLEOPTILE LENGTH</b>	Medium
<b>PEDIGREE</b>	CO08W218/Snowmass//Byrd

## Variety Protection Status

**PVP** Unauthorized Propagation Prohibited - to Be Sold by Variety name Only As a Class of Certified Seed - U.S. Protected Variety - 1994 PVPA

## AREA OF ADAPTATION

## FEATURES & BENEFITS

Released in 2018, Whistler is an attractive, late-maturing variety with taller stature, reflecting its Snowmass™ & Byrd parentage. Whistler has proven

exceptional against stripe rust, stem rust, and powdery mildew, while maintaining solid resistance to WSMV and SBMV. Focus acres on dryland only, given this variety has marginal straw strength under high moisture. Being our latest maturing release, consider this variety in a diversified strategy of planting date in the fall. PVP Protected; to be sold by variety name only as a class of certified seed.

## PEST & DISEASE PROFILE

	10	9	8	7	6	5	4	3	2	1
WHEAT STREAK MOSAIC										
STRIPE RUST										
LEAF RUST										
STEM RUST										

Rating Scale: Excellent (1-2) Very Good (3-4) Good (5-6) Fair (7-8) Poor (9-10)

### Management

- Carries wheat curl mite resistance gene from Byrd parent

- Plant seeds/acre and manage population with soil type (heavy soil, higher population, lighter soil, lower population)

- Use a plant growth regulator in high yield environments
