

AMPLIFY SF

PEDIGREE ▶ BEARPAW / ANTERO // ANTERO

Released in the fall of 2021, Amplify SF is the newest Colorado bred variety improving the options to combat the wheat stem sawfly specific to the high plains. This variety provides an improved pith rating of 17, getting us closer to the sweet spot of Colorado yield performance with superior larval cutting resistance. Its maturity fits our environment, along with resilient test weight when faced with grain fill drought conditions. Amplify SF should be on your short list of tools to keep wheat viable on the farm. Planting Semi-solid varieties should always be a part of a diversified approach to managing sawfly on your farm.

or reach out to our seed and trait specialist. Amplify SF is a PVP Protected, Certified Seed Only variety, no saved seed allowed.

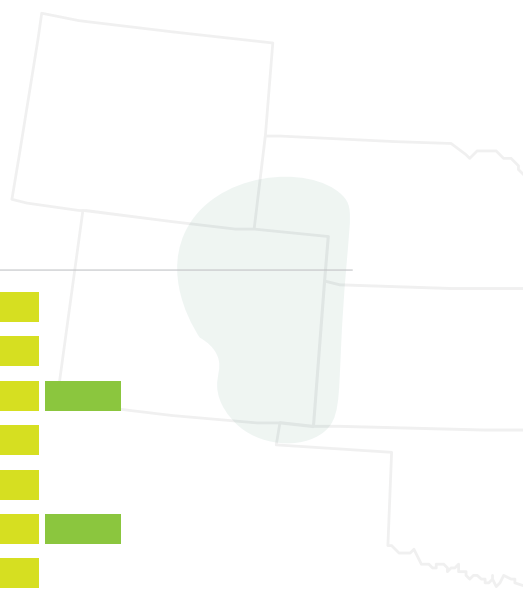

CHARACTERISTICS

- MATURITY ▶ MEDIUM
- HEIGHT ▶ MEDIUM
- COLEOPTILE LENGTH ▶ MEDIUM

YIELD	Red	Orange	Light Green	
DROUGHT TOLERANCE	Red	Orange	Light Green	
MILLING QUALITY	Red	Orange	Light Green	Dark Green
BAKING QUALITY	Red	Orange	Light Green	
STRAW STRENGTH	Red	Orange	Light Green	
TEST WEIGHT	Red	Orange	Light Green	Dark Green
PROTEIN	Red	Orange	Light Green	

QUALITY RATING ▶ POOR ■ FAIR ■ GOOD ■ VERY GOOD ■ EXCELLENT ■

MANAGEMENT NOTES

- Plant in areas most affected by Wheat Stem Sawfly
- Use in combination with early and late maturing varieties to spread out your harvest window.
- With light sawfly pressure, consider blending 70% with similar maturing varieties like Langin, Canvas, or Avery.
