

AVERY

PEDIGREE ▶ TAM112 / BYRD

HARD RED

Avery is a 2015 release that shares the drought tolerance and agronomics of Byrd, with slightly later maturity, larger kernel size, with improved straw strength and excellent SBMV resistance. Avery has proven yield across a wide geography, from Texas to South Dakota. From its parentage, Avery withstands WSMV pressure through wheat curl mite resistance. PVP Protected; to be sold by variety name only as a class of certified seed.
