

KIVARI AX

PEDIGREE ▶ (AF28 / BYRD) // (AF10 / 2*BYRD)

HARD RED

Released in 2020, Kivari AX is the newest CoAXium® variety in the PlainsGold lineup with slightly later maturity compared to Crescent AX. Kivari AX offers improved yield performance with very good spring frost and drought tolerance. Kivari AX has good test weight, good tolerance to lower pH, and wheat curl mite resistance. Due to its weaker straw in high moisture environments, it is recommended to be planted on dryland acres only. Certified Seed Only, no saved seed allowed. Stewardship Agreement required.

CHARACTERISTICS

MATURITY ▶ MEDIUM-EARLY
 HEIGHT ▶ MEDIUM
 COLEOPTILE LENGTH ▶ MEDIUM

YIELD	POOR	FAIR	GOOD	VERY GOOD	EXCELLENT
DROUGHT TOLERANCE	POOR	FAIR	GOOD	VERY GOOD	EXCELLENT
MILLING QUALITY	POOR	FAIR	GOOD	VERY GOOD	EXCELLENT
BAKING QUALITY	POOR	FAIR	GOOD	VERY GOOD	EXCELLENT
