

KIVARI AX

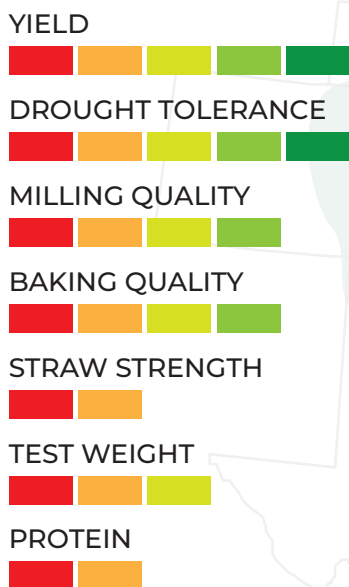

PEDIGREE ▶ (AF28 / BYRD) // (AF10 / 2*BYRD)

Released in 2020, Kivari AX is a medium early addition to the PlainsGold lineup of grassy weed fighting varieties. Kivari AX offers improved grain yield with very good spring frost tolerance and excellent drought and heat tolerance. It has good test weight, very good tolerance to aluminum toxicity and lower pH soils. Fall to Spring biomass production is good for those wanting to graze and harvest for grain production. Timing of first hollow stem is earlier than similar varieties, manage cows and nutrition accordingly if grain harvest is desired. Straw strength is fair in higher rainfall zones, if yields are expected above 80 bushels, utilize a plant growth regulator to keep upright. **PVP protected, SINGLE SEASON USE, no saved seed allowed. Stewardship Agreement Required.**

CHARACTERISTICS

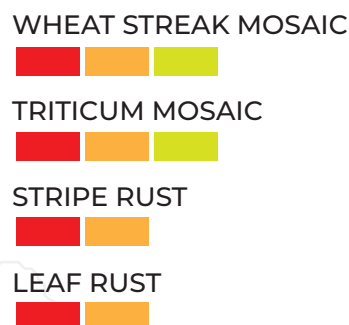

MATURITY **MEDIUM-EARLY**
HEIGHT **MEDIUM**
COLEOPTILE LENGTH **MEDIUM**

MANAGEMENT NOTES

Use as a management tool for winter annual grassy weed control:

- Feral rye:
15 gal water, 1% MSO/vol,
12 oz/ac Aggressor AX.
- Cheatgrass:
15 gal water, NIS or MSO,
10 oz/ac Aggressor AX.
- Jointed Goatgrass:
20 gal water, 1% COC/vol,
12 oz/ac Aggressor AX
